

DPS Token - Whitepaper

DPS TOKEN - WHITEPAPER

Version 1.0

Last Updated: May 2025

1. Introduction

DPS (Decentralized Power System) is a next-generation digital asset built on the TON blockchain. Its mission is to decentralize access to financial services by providing a secure, scalable, and community-governed platform for token utilities like staking, governance, and decentralized finance (DeFi) protocols.

2. Vision

Our vision is to build a financial ecosystem that empowers users with complete ownership, speed, and transparency. DPS will play a key role in enabling cross-border utility, instant staking rewards, and governance without central control.

3. Total Token Supply

- Total Supply: 5,000,000,000 (5 Billion) DPS Tokens
- Presale Round 1: 1,000,000 DPS
- Presale Round 2: 500,000 DPS

Remaining supply is reserved for liquidity, staking rewards, community incentives, and ecosystem development.

4. Token Utility

DPS Token is designed with multi-dimensional utility including:

- Staking: Users can stake their DPS to earn passive rewards.
- Governance: Token holders can vote on key proposals and ecosystem changes.
- Swapping: Instant swapping features through integrations with decentralized exchanges (DEX).
- DeFi Integrations: DPS will power future lending, farming, and yield tools.
- Incentives: Used for rewarding community engagement and early adopters.

5. Technology Overview

- Blockchain Base: Built on The Open Network (TON) for ultra-fast, cost-effective, and secure smart contract

transactions.

- Smart Contracts: Fully audited contracts ensure safety and security.
- Cross-Platform Wallets: Compatible with Tonkeeper, Tonhub, and other major TON wallets.

6. Presale Structure

Round 1:

- Supply: 1,000,000 DPS
- Early bird pricing with maximum bonus
- Limited allocation per wallet

Round 2:

- Supply: 500,000 DPS
- Slightly higher price
- Priority for Round 1 participants

7. Roadmap

Q1 2025: Token Deployment & Presale Launch

Q2 2025: Staking Platform & User Dashboard

Q3 2025: CEX Listings & DeFi Integration

Q4 2025: Governance Launch & NFT Utility

2026: DPS Chain Utility Expansion

8. Security Audits

All DPS smart contracts undergo independent code audits and bug bounties. Security is a top priority, and contract updates will only happen through decentralized governance votes.

9. Community Governance

DPS puts power in the hands of the holders. Through on-chain proposals and voting, users can:

- Propose future utilities
- Vote on fees, staking terms
- Elect community contributors

10. Team & Transparency

The DPS development team consists of blockchain engineers, crypto economists, and community builders from around the globe. Transparency, open communication, and decentralization are core to our culture.

11. FAQs

Q: What is DPS Token?

A: A decentralized token for DeFi, staking, and governance on the TON blockchain.

Q: How to join the presale?

A: Visit our official website, connect your wallet, and access the swapping section.

Q: Is DPS staking live?

A: Yes. You can stake your tokens via the dashboard and earn rewards instantly.

Q: Which wallets are supported?

A: Tonkeeper and Tonhub are the most recommended TON-compatible wallets.
